

# National Instruments - ICCA seminar

## Get hands-on experience with a CompactDAQ and LabVIEW system.

During this interactive seminar, NI engineers guide you through hands-on exercises designed to help you evaluate CompactDAQ and LabVIEW for your measurement application. See how you can create a data acquisition system for collecting, analyzing, and storing measurement data using NI hardware and software.

### Register and attend this seminar to:

- Know more Academic Programs, Startup Creation Support and Industrial Focus Area
- Be up to date with the most recent Advances in RF and Telecommunication Systems
- Build Example of Mechatronics Application through a Hardware Demo-session
- Familiarize yourself with LabVIEW, LabVIEW-FPGA and USRP Platforms
